

Project Management Diploma & Co-op

Increasingly, today's leading companies need project management specialists capable of delivering mission-critical work on time and on budget. A solid understanding of sound project management techniques and processes and the confidence to apply them appropriately throughout are essential to project success. The Project Management Co-op is an integral component of this program as it provides students with essential experience needed to meet the PMI criteria. Students who successfully complete the program will receive a Canadian College Project Management Diploma and either PMI's PMP certification (minimum 3 years related work experience) or the CAPM certification (no experience necessary).
